

Helping people find their pivot in the AI era.

A Singapore-based nonprofit building inclusive workforce pathways at the intersection of AI fluency, career mobility, and systems change across Asia Pacific.

WHAT WE BUILD

Direction
Capability
Confidence
Opportunity

— and the evidence loop that
helps systems change.

Training exists. Jobs exist. The connection doesn't.

AI is reshaping work faster than most systems can respond. The gap is not a lack of courses — it is direction, evidence, and a structured path from learning to a real role.

51%

of workers do not know what skills to learn next

BCG / Jobstreet, 2024

53%

are willing to reskill, but lack a structured path

BCG / Jobstreet, 2024

36%

skill disruption rate across Singapore industries

WEF Future of Jobs, 2025

A connector, catalyst, and evidence engine.

Pivot Project helps people at critical transition points move from AI uncertainty to real career pathways.

We connect communities, employers, training partners, and policy stakeholders around one structured journey: direction first, skilling second, applied work third, and evidence back into the system.

FOUNDER

Annie Mathew

Former Microsoft Director. Founder of Code Without Barriers, which upskilled 600,000+ women learners in AI across 12 countries.

OPERATING BELIEF

Skills alone are not enough. Human-led systems move people.

People at critical transition points.

We focus on audiences where AI disruption, opportunity, and exclusion collide — and where the right pathway creates outsized impact.

Students entering work

AI fluency, career discovery, future-ready confidence

Teachers preparing learners

Force multipliers who scale AI literacy in classrooms

Women returning or repositioning

Mentoring, credentials, networks, and applied pathways

Senior professionals

Domain depth and judgment translated into AI-era roles

Neurodiverse talent

Different ways of seeing, solving, and stress-testing AI

The PIVOT Framework

Five stages. One structured journey from direction to a real role.

Direction first. Skilling second. Applied work third. Evidence back into the system.

Microsoft Elevate shows the model in practice.

A partner-funded project can pull from several programme engines to create one integrated pathway.

DELIVERY PARTNERS

**iTrain Asia + Trainocate
for skilling**

Avid Adventures
for mentoring and career simulation

We don't just train. We close the loop.

1

A methodology, not just content

The PIVOT Framework is structured IP — direction first, skilling second, applied work third.

2

A system, not a pipeline

We connect government, employers, training partners, and community networks around one journey.

3

Evidence into policy

Cohort data feeds into roundtables and policy dialogue — what we learn shapes the system.

**Four pillars.
Seven engines.
One system that
turns capability into
real pathways.**

A Singapore anchor. An Asia Pacific footprint.

Live or active work across Singapore, Malaysia, Philippines, and New Zealand — supported by a partner ecosystem that connects curriculum, data, delivery, community reach, and employer pathways.

Technology / curriculum

Microsoft AI Fluency pathways;
AI-900

Data + networks

LinkedIn job data and mentoring

Inclusion expertise

Institute of Neurodiversity

Delivery partners

iTrain Asia, Trainocate, Avid
Adventures

Policy alignment

WSG / IMDA / MOE pathways

Community reach

Women-in-tech, student, and
neurodiverse communities

No single partner can take someone from excluded to employed alone. Pivot provides the pathway across all of them.

Programme traction. System traction.

4,200+

learners through Pivot Project

Programme tracking

9.4/10

average participant satisfaction

Participant feedback

+22.6%

lift in employability confidence

Pre / post survey

POLICY & INSTITUTIONAL STANDING

~20 senior leaders convened across government, statutory boards, industry, technology, capital, business councils, community, and civil society.

Build inclusive AI workforce pathways with Pivot Project.

For funders

Sponsor cohorts, programme infrastructure, and the evidence work that informs system change.

For employers

Host applied projects, fellowships, mentoring, or placements that turn learning into opportunity.

For ecosystem partners

Extend reach into schools, communities, institutions, and priority populations.

**Let's talk about
your pivot.**
